TRIOTRAC NEW EDITION WITH UNIQUE LIFT AXLE

Triotrac New Edition with unique lift axle

The Triotrac self-propelled mixer feeder from Trioliet has been a huge help for dairy farmers and contractors for many years now. However, the 'New Edition' features improvements that meet farmers' needs even better. The machine comes with a new and more comfortable cabin, a telescopic cutting-loading system with discharge height of up to 6 metres, and an Ecodrive system for even greater fuel efficiency. And that's not all! The Triotrac New Edition is available with unique lift axle from now.

Key benefits of this unique lift axle are:

- **Ability to reduce the ground pressure per axle.**

Especially on old farms (which often are visited by contractors) this is an advantage since the carrying capacity of the yard is often not that good. In addition, it is important on cargo by road. The total weight allowed with two axles is 18 tonnes and with three axles this is 25 tonnes. (This means a Triotrac 2000 with 3 axles is able to carry 7,900 kg of load by road).

- **Steered 3rd axle, easier to manoeuvre.**

- **The lift axle can be switched on and off.**

The pressure on the axis is increased or decreased with the aid of a weighing signal, according to the load. The fixed rear axle will be relieved.

- **Save on tire and brake wear.**

- **Hydraulic suspension**

- **Non-driven axle**
